## -: Query On Program Library :-

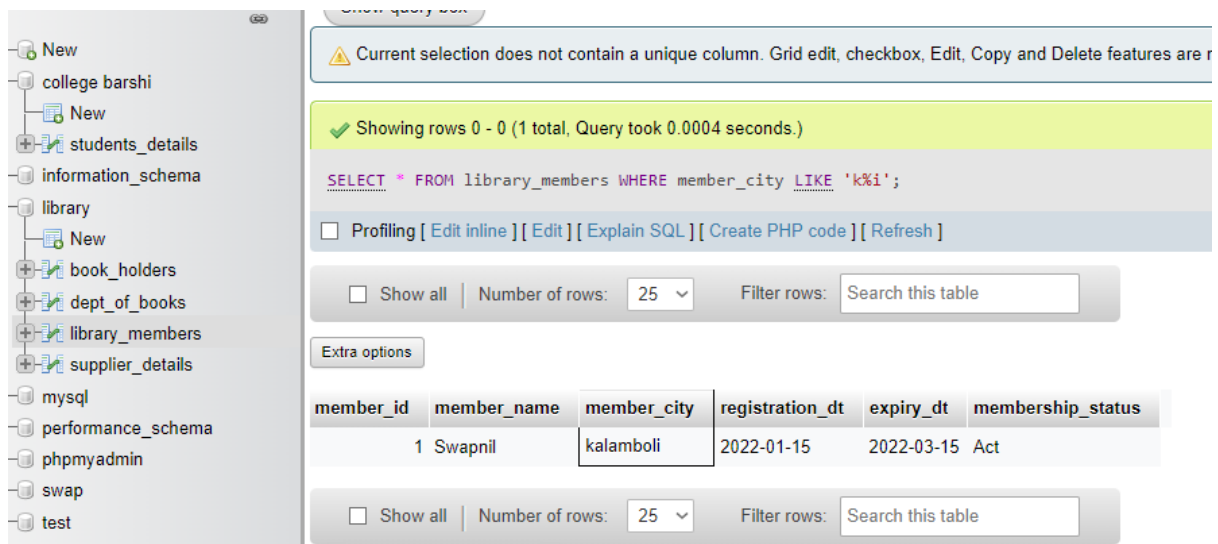

1.WAQ whos membership is expired.

The screenshot shows the phpMyAdmin interface. On the left is a sidebar with a tree view of databases and tables. The 'library' database is selected, and the 'library\_members' table is highlighted. The main panel displays a query result for the query: `SELECT * FROM library_members WHERE membership_status='exp';`. The result shows 5 rows of members whose membership has expired. A warning message at the top states: "Current selection does not contain a unique column. Grid edit, checkbox, Edit, Copy and Delete features are not available." Below the query, there are links for "Profiling", "Edit inline", "Edit", "Explain SQL", "Create PHP code", and "Refresh". A control bar shows "Show all", "Number of rows: 25", and a "Filter rows" search box. Below this is an "Extra options" button. The result table has columns: member\_id, member\_name, member\_city, registration\_dt, expiry\_dt, and membership\_status.
